

SUGGESTIONS AND RULES

Dear colleagues,

1. Whatever you are doing with your group in class or at school level, that is also related to our project, post it on the website assigned to you on Twinspace (pictures, videos, presentations, quizzes, stories, songs, etc.)
2. If you want to achieve international cooperation, contact with your partner in international teams and students. After completing the activities or tasks post the results of your collaboration on related pages and on the teachers' bulletin board, so we all can see your results, and comment your work.
3. If you have an idea for better joint cooperation, suggest additional activities and create them. Feel free to choose how you will carry out the activities (at the level of your group, at the level of your school or in cooperation with a team from another partner country).
4. You can choose more activities if you would love to do. Try to choose activities according to your capabilities and feel free to choose more activities.
5. On every page of our Twinspace, it is possible to write a comment, suggestion, praise students, express gratitude. I propose that this platform be informative, supportive and cooperative at the same time.
6. All the questions that bother you, you don't know how to solve the problem or you want advice, post them on the notice board for teachers. Everyone feel free to get involved in the comments, answer the question, help each other. That part is also partnership cooperation, communication and support.
7. Everything you don't know about creating Twinspace, you can find under Support. Please, be kind to read this instructions and doing by them.
8. If you encounter technical problems, please inform your national service. They are in charge of solving these problems.

Regards,

Pınar Öztürk
