

E.T.H.N.I.C

SHORT DESCRIPTION

The word 'ethnic' means belonging to a group made up of people who share a common cultural background; however, quite the contrary of its discriminator meaning, the main goal of that project is combining all people together from different nations or cultures. The name of the project is an abbreviation of some concepts emphasizing positive attitudes of inclusion education: E stands for 'Empathy', T for 'Tolerance', H for 'Humanism', N for 'Needs', I for 'Inclusion', C for 'Culture'.

We aim to provide a positive learning atmosphere for children who have difficult life conditions (health problems, family problems or migration, etc). We will include ALL students in teaching- learning processes by communicating with other European countries and using target language through online activities and games.

AIMS

- Providing all students, the most appropriate learning environments and opportunities for them to best achieve their potential.
- Providing better opportunities for learning and social skills,
 - Learning daily life English,
 - Being a part of the community,
 - Developing a sense of belonging,
- Finding out immigrant students potentials,
- Including all students in the typical learning environment,
- Providing the opportunity to participate in regular classrooms with same-aged peers in their neighborhood school,
 - Giving the opportunity to participate in all aspects of life,
- Addressing social, emotional, physical aspects of a child's development.
 - Improving digital competences.

WORK PROCESS

We will try to include students in learning by presenting them game-based activities that they may have fun. They will learn daily life language and idioms to help them understand better the community they live with. Students are going to notice the concepts of empathy and humanism via role- play activities. The final products of the project will be an international dictionary and language learning videos/ booklets.

EXPECTED RESULTS

At the end of this Project,
We are going to highlight immigrant children's needs, special education students' needs and find out the obstacles they face during their school life. This may lead us find new methods, organize learning environments, developing social skills among the peers. Thanks to the benefits of other countries' sharings, teachers can get the opportunity to be aware of the implementations in the world.
By achieving our goals, we will Include all the children to the education, help them to realize their dreams which is extremely important all over the world.
